

THE WORKS

SITE UPDATE

Our site at Llwyn Eirin in Denbigh continues to make good progress with 18 out of the 22 properties currently under construction. The Passive House design will provide the new residents with a highly insulated home with energy efficient ground source heat pumps and an MVHR system. The triple glazed windows have just arrived from Austria and will be installed next week.

COMMUNITY BENEFITS

Great to see that the Victorian tram shelter in Llandudno has had the roof and gutters completed as part of our community benefits for our Gloddaeth Street development we have recently completed. We have now handed over to Creating Enterprise to complete the low level refurbishment works.
